Sea Minerals Water selects LIFE Outreach International for Water Mission Giving

Newnan, GA – July 18, 2008 – Sea Minerals Water, Inc. invests one-percent of every dollar sold to deliver clean drinking water to those in need. Even though we are new company in the nutrition field, we understand the importance of giving to those who cannot help themselves, said Preston Haag, Jr. the Chairman of the company. SMW's management team made a decision to be a vessel to help people around the world with life-giving products and to help provide funds to dig wells for people to have clean water to drink.

Sea Minerals Water, Inc. has selected to support our Water Mission giving to LIFE Outreach International. LIFE was chosen because of their outstanding efforts in their Water for LIFE program and their heart for loving people. This ministries clean drinking water program has continued to grow and they are in their six consecutive summer for digging new wells. This year LIFE and its mission partners will work to fund the drilling, construction and placement of 100 new, fresh water wells in 12 nations on four continents: Albania, Dominican Republic, Belize, Cuba, China, India, Haiti, Kosava, Madagascar, Cambodia, Nepal, Nicaragua. Since the beginning of their global efforts outside of Africa, they have surpassed 1200 new water wells in more than 25 nations.

Preston Haag, the Chairman of Sea Minerals Water said, "LIFE Outreach International's expertise and integrity enables them to place each well in strategic areas more effectively than us going it alone." LIFE's wells provide clean drinking water to about 1,000 people for as little as \$4,800 per well. Their efficiency gets the cost of providing clean drinking water to those in need for as little as \$4.80 for life.

Water shortage and water contamination is a growing global problem, yet in most cases the answer is right beneath people's feet. Often, reservoirs of clean water are located 100', 200' or as deep as 1000' below the surface. Today, 18% of the world does not have access to clean water. That is over 1.2 billion people! For these who have access only to diseased and dirty water, the gift of clean water is a gift of life! Sea Minerals Water, Inc. knows that we cannot turn this global issue around alone, however we can do our part to support LIFE Outreach International Water for LIFE program.
